recent research has found high levels of stress and burnout amongst medical students leading to students dropping out or leaving the profession early this book explores burnout in medical students from across the globe and provides ideas for a model of care to help educators and individuals take steps towards better student wellbeing

gender and the making of modern medicine in colonial egypt investigates the use of medicine as a tool of empire to serve the state building process in egypt by the british colonial administration it argues that the colonial state effectively transformed egyptian medical practice and medical knowledge in ways that were decidedly gendered on the one hand women medical professionals who had once trained as doctresses hakimas were now restricted in their medical training and therefore saw their social status decline despite colonial modernity s promise of progress on the other hand the introduction of colonial medicine gendered egyptian medicine in ways that privileged men and masculinity far from being totalized colonial subjects egyptian doctors paradoxically reappropriated aspects of victorian science to forge an anticolonial nationalist discourse premised on the egyptian woman as mother of the nation by relegating egyptian women whether as midwives or housewives to maternal roles in the home colonial medicine was determinative in diminishing what control women formerly exercised over their profession homes and bodies through its medical dictates to care for others by interrogating how colonial medicine was constituted hibba abugideiri reveals how the

this study of the early development of egypt s medical profession confronts the eurocentric view of the history of modern medicine and illustrates the complexities of modernization in a colonial setting it demonstrates the importance of cultural continuity to any process of change

in middle eastern and islamic societies the politics of sexual knowledge is a delicate and often controversial subject sherry sayed gadelrab focuses on nineteenth and early twentieth century egypt claiming that during this period there was a perceptible shift in the medical discourse surrounding conceptualisations of sex differences and the construction of sexuality medical authorities began to promote theories that suggested men s innate active sexuality as opposed to women s more passive characteristics interpreting the differences in female and male bodies to correspond to this hierarchy through examining the interconnection of medical legal religious and moral discourses on sexual behaviour gadelrab highlights the association between sex sexuality and the creation and recreation of the concept of gender at this crucial moment in the development of egyptian society by analysing the debates at the time surrounding science medicine morality modernity and sexuality she paints a nuanced picture of the egyptian understanding and manipulation of the concepts of sex and gender
